Hi Richard and Pamela

I am not sure we need to provide a written response to this letter but we are going to need your help responding to the claims in attachment one. This claim that an upfront TI is possible for the EWW site is the most significant issue that needs to be explained to management and is much more important than focusing on how long the background study will take IMHO. Kira

**Subject:** East Waterway Group Letter to EPA regarding East Waterway remedy

Kira,

On behalf of the East Waterway Group, I wanted thank you for meeting with us on February 25, 2020, regarding the status of the Proposed Plan for the East Waterway cleanup. We appreciate the time EPA has taken to understand our concerns regarding the remedy. At your request, we are providing feedback on the remedy options you identified during our February meeting. This feedback is provided in the attached letter. We look forward to working with you as we move forward towards a final cleanup. Please don't hesitate to reach out to me with questions.
